Nimbus Cloud - Account Guide

This guide explains how to manage your Nimbus Cloud account, including sign-in, passwords and two-factor authentication.

Resetting your password

To reset your password, open the Nimbus sign-in page and choose 'Forgot password'. Enter the email address linked to your account. Nimbus sends a reset link that is valid for 30 minutes. Click the link, choose a new password of at least 12 characters, and confirm it.

If the email does not arrive within 5 minutes, check your spam folder, then request a new link. After 5 failed sign-in attempts your account is locked for 15 minutes.

Two-factor authentication (2FA)

Enable 2FA under Settings > Security > Two-factor authentication. Nimbus supports authenticator apps and hardware security keys. SMS codes are not supported. Save the 10 recovery codes shown during setup; each code works once.

Changing the account email

Account owners can change the login email under Settings > Profile. A confirmation link is sent to the new address and must be opened within 24 hours.
